WHAT DRIVES US

OUR VISION

Drive innovations to address unmet and underserved medical needs and improve the quality of lives around the world.

OUR MISSION

Bring a forward-thinking and entrepreneurial approach to developing and improving products, processes and technologies that address unmet and underserved needs and create positive change for physicians and their patients.

“ We have developed and refined a business model that draws from the insight and intellect of some of the greatest scientists, clinicians, regulatory experts and creative corporate leaders in eye care.

This previously untapped exchange of experiential information is the driving force of our impactful innovation and operational excellence. With the implementation of these understandings and perspectives we are able to focus on the most important endpoint of our efforts, the quality of patient care provided through our company’s product portfolio.

”

Patrick H. Witham
PRESIDENT & CEO
